Education

Queen's University – **Bachelor's Degree in Computer Science, Honours** – (Kingston, ON) **Graduating: 2026**

- Software Design Specialization
- Dean's Honour List, GPA: 3.7

Work Experience

Global Affairs Canada – **Junior Software Developer/Business Analyst** – (Remote, Canada) **09.2024 – 08.2025**

- Built and refined 8 custom client relation management (CRM) systems using Microsoft Dynamics 365, Power Platform, and Azure DevOps.
- Shipped 500+ technical improvements, user experience enhancements, and bug fixes to real-world production used by 2000+ personnel.
- Created 10+ active Power BI dashboards with 30+ real-time metrics to visualize operational insights for internal business units.
- Elicited hundreds of requirements from 50+ stakeholders, achieving 99% customer satisfaction upon project completion.
- Managed security roles and permissions for 30+ client teams across development, testing, and production.
- Developed automated data migration flows and CI/CD deployment pipelines for CRM systems across various environments.

Lockheed Martin – **Software Engineering Intern** – (Remote, Canada) **05.2024 – 08.2024**

- Programmed 3 DXL scripts to speed up military vehicle design version extraction by 30%.
- Wrote a Python tool to transform 20,000+ relational database objects into secure, readable XML files for classified reporting.
- Automated linking across 3000+ relational database objects using C, saving 20+ hours of manual work each week.
- Identified 5+ schema issues in weekly cross-team design reviews, decreasing release delays.

Lockheed Martin – **Program Management Intern** – (Remote, Canada) **09.2023 – 04.2024**

- Produced Tableau and Jira dashboards to visualize 150+ KPIs from a $XXX,000,000 weapons program.
- Published 30+ pages of Agile docs on Confluence to help ease Agile collaboration between 20+ teams and 200+ engineers.
- Created custom Jira workflows to track risk items, shortening problem identification time by 40%
- Wrote 5+ internal training documents, cutting onboarding time by 50% for newly hired interns.
- Supported quarterly reviews by preparing reports for senior leadership, summarizing program status and KPIs.

Lockheed Martin – **Systems Engineering Intern** – (Montreal, QC) **01.2023 – 08.2023**

- Authored 3 detailed system models in CAMEO (UML) to support architecture design and certification workflows.
- Revised 2000+ data objects for compliance tracking using PTC Windchill and IBM DOORS.
- Reviewed 100+ Design Appraisal Documents, Engineering Change Requests, Procurement Packages, Clearance Requirements, and Project Implementation Proposals to support approvals and compliance tracking.

Leadership Experience

Queen's Computing Students Association – **Vice President of Student Affairs** – (Kingston, ON) **05.2025 – Present**

- Represented 1600+ students in discussions with the undergraduate trustee board, arts & sciences board, and school faculty.
- Managed a portfolio of 80+ students to bring 30+ professional development and community building events to 1600+ students.

QHacks – **Co-Chair** – (Kingston, ON) **05.2025 – Present**

- Led planning and strategy for one of Canada's largest student-run hackathons, attracting 500+ participants and 25+ industry partners.
- Oversaw six portfolios, ensuring smooth coordination between sponsorship, logistics, operations, finance, marketing, and tech teams.

Queen's Computing Orientation – **Head of Operations** – (Kingston, ON) **01.2025 – Present**

- Directed internal operations for a large scale, two-week-long event with 400+ participants grossing over $100,000 revenue.
- Hired and trained 100+ student orientation leaders on best practices for interacting with 400+ incoming first year university students.

Smith Business and Technology – **Re-Founder/Co-Chair** – (Kingston, ON) **05.2024 – 04.2025**

- Revitalized the club's identity by overhauling marketing materials and mission statements, leading to a 60% increase in membership.
- Oversaw 2 large scale student events centered around the intersection of business and technology, netting 300+ attendees.

Queen's Data Analytics Association – **Director of Artificial Intelligence** – (Kingston, ON) **05.2023 – 04.2024**

- Founded QDAA's AI division – focused on bringing attention to the cross-section between Data Analytics and Artificial Intelligence.
- Delivered 3 workshops on NLP, equipping 50+ students with hands-on experience in implementing AI models.

Skills and Qualifications

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, C++, C
Tools: Git, GitHub, GitHub Actions, React, Docker, Kubernetes, Django, Jira, Confluence, PowerApps, Microsoft Dynamics, Vercel, Azure
Databases: AWS, Supabase, DynamoDB, MongoDB, DOORS/DXL, Dataverse, Firebase
Data Science & Machine Learning: TensorFlow, Pandas, PyTorch, NumPy, Power BI, Tableau, OpenCV, SciPy
Design: Figma, Canva, MURAL, CAMEO, Draw.io
Software Testing: Selenium, Postman, Jest, Appium, PyTest
